

Automating patches is only half the battle.

PROVING YOU'RE **SECURE** IS HOW YOU WIN.

Third-party applications remain a major source of security risk. Patch My PC automates third-party patching across Microsoft Intune, ConfigMgr, and WSUS while giving IT and security teams visibility to prove compliance, reduce risk, and stay ahead of vulnerabilities.

Our Subscriptions Include

Automated third-party patching for Intune, ConfigMgr and WSUS

Same-day packaging and publishing

Support for 3,400+ applications

Automated deployment workflows

Compliance & operational reporting with Advanced Insights

Device, app, Secure Boot, battery, and disk visibility

App Migration from ConfigMgr to Intune

Expert support for PSADT & custom apps

Advanced troubleshooting & environment visibility

ENTERPRISE PLUS

ENTERPRISE PREMIUM

PATCH MY PC PLUS IS BUILT FOR TEAMS THAT WANT TO:

- Replace manual patching workflows
- Stay current on third-party application updates
- Reduce time spent packaging and testing apps
- Simplify day-to-day patch management operations
- Less whack-a-mole, more strategic improvements to your environment

ENTERPRISE PREMIUM IS BUILT FOR TEAMS THAT WANT TO:

- Future-proof patching workflows
- Prove real-time estate compliance
- Streamline the most complex app workflows
- Gain deeper operational visibility across the environment

See which approach fits your environment before making a decision.
