

Why Premium

Leveling up your patch
management practice

H2 2026

Many companies **outgrow** lightweight patch management tools

Managing more endpoints or more apps requires more robust reporting, more elegant cloud-migration capabilities, and more visibility to compliance status.

are we patched

Advanced Insights gives you a **one-glance view** of your environment.

Unlock real-time **compliance status** updates

Stop wasting time file-hunting and **stitching reports**

the future is calling

Microsoft is encouraging orgs
to move to Intune to access
all the newest endpoint
management capabilities

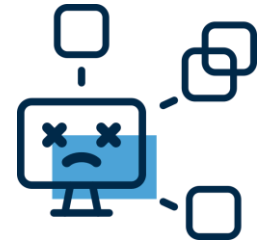

But getting to the cloud with years
of configurations is harder than
flipping a switch

We help you get there without reinventing the wheel

client- enabled solutions

When the next **"everyone has to deal with this"** update arrives, your tools should already be ready.

Like with Secure Boot, our software client can help you solve complex problems.

With Enterprise Premium

You get the curated catalog and automation you trust and unlock robust reporting platform and a more future-proof strategy.

Get patched and prove you did it.

- Patch automation to beat attackers
- Advanced Insights to ensure audits go smoothly
- Migration support for your journey to the cloud
