# Simplified Third-Party Application Management

We help you extend Microsoft Endpoint Manager (**ConfigMgr** and **Intune**) capabilities by seamlessly integrating third-party patching and application management. Our average customer saves about **6,000 hours per year** and publishes over 1,329 updates and applications. This saves administrative time by eliminating the manual packaging of third-party products.

One of the most common ways computers are exploited is vulnerabilities in outdated third-party applications or libraries. A primary benefit of our product is **improved security** through patching vulnerable third-party applications. In 2020, we released a total of 2,915 third-party updates, which addressed **1,530 CVEs**.

By only focusing on application management, you can ensure you receive a team dedicated solely to this problem. **We're a small team passionate about what we do, why we do it, and who we do it for**.

Patch My PC

WSUS/ConfigMgr   Microsoft Intune

Endpoints
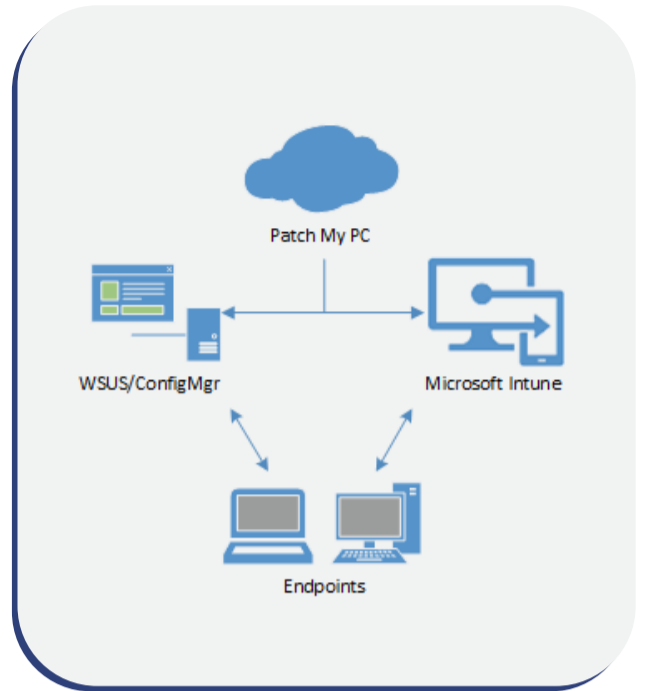

Product Features

Automate Third-Party Updates

- Third-party updates automatically published to SCCM and Intune
- Use existing processes to deploy updates, including ADR's
- Report on non-compliance for third-party updates in the same way as Microsoft updates
- Automatically scan your SCCM or Intune inventory to auto-enable product for publishing
- Our application feature allows you to rollback third-party updates if needed
- Third-party updates typically released the same day as the vendor makes it available

Compliance Dashboards

- Use existing reports in SCCM for third-party update compliance
- Custom SSRS dashboards for SCCM to easily view compliance trends
- Power BI compliance dashboard for Microsoft Intune

Microsoft Intune Integration

- Automatically create Win32 applications and updates
- Bulk assign applications to groups
- Add application to enrollment status pages for Autopilot
- PowerBI dashboard to receive insights from Intune devices

Native SCCM and Intune Integration

- No additional agents
- No additional infrastructure
- Use native features and functionality of SCCM and Intune
- Use automatic deployment rules, task sequences, collection deployments, Autopilot, and more

Automatically Create Applications

- Create base applications for SCCM and Intune
- Eliminate manual packaging of applications
- Auto-update applications to the latest version
- Ensure new machines always receive the most secure version of an application
- Use existing deployment mechanisms: task sequences, collections, or Intune assignments
- Applications include vendor icons, descriptions, and keywords

Customize Application Settings

- Use custom pre or post installations scripts
- Disable automatic updates for products
- Enable logging for install troubleshooting
- Add custom command-line arguments

Increased Security

- Visibility into third-party update compliance
- Over 2,900 updates released in 2020
- 1,530 CVEs resolved in 2020
- 737 security updates in 2020
- Real-time alerts when new third-party are published
- CVE import wizard from external systems

Support and Working With Us

Support Included at No Extra Cost

Never worry about additional fees or paying for support. Our **support is included** from the initial interaction, both with our free full trial and paid subscription. Support is in-house, with engineers located in North America, Europe, and Australia. Support at a glance:

- 1-hour setup session
- 30-minute Environment Review and Q&A Session
- Support options by phone, email, forum, or live chat

User Voice – We Don't Know What We Don't Know!

There's nothing more important to us than our customers and their feedback! If there are applications or features you would like to see added to our product, we encourage you to **submit feedback on our UserVoice website**.

We prioritize app and feature development of our software based on feedback from our community, ensuring that we keep our customers at the forefront. We have a large repository of apps that are continually growing based on our customer feedback.

Proactive Customer Care

This program ensures updates and applications are successfully publishing to WSUS, ConfigMgr, or Intune. When we receive insights that critical operations have failed, we will **notify you proactively about any issues**. We want to ensure our automation is integrated into your day-to-day workflows and just works, so you don't have to worry.

180-day Money-back Guarantee

We want you to be 100% satisfied with our services, so even after our initial free trial period, we offer a **180-day full money-back guarantee**.

What Our Customers Say About Us

Trusted by Over 2,300 Enterprises on Over 7 Million Endpoints

"Patch My PC has taken the guesswork out of third party patching for the IT department at UNC Charlotte. Their solution is an easy to use yet powerful tool that helps ensure the security of the workstations across campus. The customer service they provide also stands above the competition."

- Chris Epting, UNC Charlotte

"Being a UI lover, the most I liked about Patch My PC is the Admin UI experience. It's very user-friendly, and there is no learning curve at all. You install it, and it's all set and ready to go!"

- Anoop C Nair, Microsoft MVP

"Implementing Patch My PC is like getting 2-3 new full-time employees. The configuration is quick, and the reward is huge. We have over 200 applications patched by Patch My PC, many of which were never patched before. Everything is fully automated so we can focus on bigger and better things. Vulnerability scans get smaller and user experience goes up. What really sets Patch My PC apart from the competition is their commitment to us. Contacting support is more like phoning a friend for help. We get help directly from the people that develop the product and they don't stop until we're completely happy."

- Rudy Bankson, Washington State Department of Revenue

"Having the automation Patch My PC allows for in your enterprise environment is like having an extra 8 people ensuring the latest updates are packaged and available for 100s of apps in your environment. In an ever more complex landscape, this is one less thing you need to dedicate full-time resources to handle well in your environment. Pair this with Patch My PC's amazing responsiveness and customer service, and it all makes the solution worth much more than its weight in gold. If you are sitting on making the decision to get a Patch My PC subscription for your company, you are literally losing money in resource time."

- Sean Huggans, Sanford Health

"Since we started using Patch My PC, we no longer fear how we will be able to patch and deploy applications in our environment. Patches are 100% automated with SCCM ADRs and Intune. The applications deployed will self-update as well. That way, your Software Center and Company Portal are always deploying the latest version. The solution is user-friendly, very intuitive, and the support is great."

- Bruce Sa, NTT
