Advanced Insights
PATCH MY PC

Innovative reporting and patch compliance solutions **for the modern business**

Immediately understand your compliance status against the latest updates at a glance. Through one easy-to-use portal Advanced Insights empowers your team leaders and helpdesk analysts to find, interrogate, and act on incidents raised by your users working with ConfigMgr's rich dataset and Advanced Insights' responsive interface. It's a quick-scan, visual representation of your entire software update landscape for technicians and managers.

Advanced CVE Reporting

Drillthrough Dashboards

Better Insights On Your Data

Scan To Learn More

Advanced **Features**

- Actionable insights that can be continually filtered and exported

- Drill down to detailed inventory, compliance, warranty, and health data

- Wakeup, restart, remote control, and other console actions – all from the portal

- Check instantly that your deployments are functioning and processes are performing

- Enhance ConfigMgr data with custom inventory and additional 3rd party data for disk & battery health, monitor information, support, warranty data, and more

- Faster, more accurate results than searching within ConfigMgr natively

- One intuitive UI that anyone can use

- Integration with MSRC and NIST APIs provides security posture reporting and detailed CVE information for your Microsoft and Patch My PC update landscape

Advanced **Security**

- Correct any issues before they escalate

- Easily search all inventory, compliance, and status data in ConfigMgr with a single term

- One friendly portal for helpdesk analysts to access the dense, valuable data on any user's devices, applications, available RAM, required updates, and more

- Empower analysts to instantly take action on any information found in ConfigMgr with the build-in tools of Advanced Insights

Advanced **Usability**

- Improve the output and usability of ConfigMgr for your support teams

- Usable information and tools directly at the helpdesk's fingertips

- Dashboards for devices, users, apps, Office, updates, OS Deployment, BitLocker, Endpoint Protection, and more

- Minimize time spent collating information by using one search function

Advanced **Results**

- Compliance summary and detail through a single window

- Instant visibility of the critical statistics in ConfigMgr in seconds

- Get results from any part of your dataset with minimal upfront information or input

- Instant results to maximize your productivity

- Remove compliance guesswork headaches
